Bent
a1
a curtain adapted to be secured at a top end thereof to the roller whereby rotation of the roller causes the curtain to wind or unwind from the roller to move between unblocking and blocking positions, respectively;

guide members adapted to be disposed at the lateral sides of the door opening;

guide engagement members couplable to the curtain for movement therewith and engageable with the guide members to restrict their movement toward the curtain center; and

a discrete elastic member coupled to the curtain for movement therewith and extending laterally across the curtain, and disposed such that the elastic member can be stretched between the restricted guide engagement members.

26. (Amended) A roll-up closure device adapted to be disposed adjacent a door opening and movable between blocking and unblocking position relative thereto, and comprising:

a roller adapted to be rotatably mountable adjacent an upper end of the door opening;

a curtain adapted to be secured at a top end thereof to the roller whereby rotation of the roller causes the curtain to wind or unwind from the roller to move between unblocking and blocking positions, respectively;

guide members adapted to be disposed at the lateral sides of the door opening; and

laterally inwardly biasing means for maintaining the curtain taut, and for allowing the curtain to yield depth-wise for an applied force.
